

A PRESENTATION ON

MATERIALE CENTRALEN

BY FEDERICA PIAZZA

WHAT IS IT?

Materiale Centralen is a project inside the recycling center of Vasbygade and part of the Guldminen Experiment.

It is a network linking resources, people and constructions.

WHAT WE DO?

The role of Materiale CentraLEN is to be the mediator between the recycling center materials and companies or projects interested in giving these resources a second chance and “life”.

OUR MISSION

Our mission is to save materials that are meant to be thrown away, stoking them and fixing them. To create upcycled products, giving a second life to the materials, working on an online platform, establishing connections.

Distribute materials for outside projects and spread knowledge and education, organizing workshops and events.

ORDER PROCESS

CONTACT US

Looking for second-hand materials to support your projects?

THE WISHLIST

We will send you a wish list and our E-catalogue.

EVALUATION

After reviewing your wish list, we will make an estimation of costs, availability of materials and the time for the golddigging.

GOLD DIGGING

We start collecting and storing your wished materials. You are welcome to join the experience!

PICK-UP

We arrange a Pick-up time for you to come and take your materials

A PRESENTATION ON MATERIALE CENTRALEN

PROJECT REVIEW

FLYDENDE BY

Flydende By is one of our main partners in MC.

We support, for exemple, "Flydende By UpCycles" bike workshop that works on fixing and maintaining up-cycled bikes through bike parts and bike frames that we collect.

Our material flow consists mostly of wood and metal following furniture and electronics.

EMERGENCY ARCHITECTURE & HUMAN RIGHTS

EA-HR is one of MC clients and projects partner. We are providing materials for the Homeless project 2.0.

Our material flow consists mostly on wood such as EUR pallets, planks and building materials in general.

<http://ea-hr.org/>

UTOPIA SCHOOL

MC mission is to spread knowledge and believes in an inclusive education.

We collaborated with Utopia School providing them materials for their workshops and activities.

Our material flow consisted of kitchen utility, furniture, wood, plywood, glass and metal.

A PRESENTATION MATERIALE CENTRALEN

FOODSHARINGCPH

We support Food Sharing Copenhagen local initiative and we provided them materials to improve their physical environment.

Our material flow consisted of wooden doors, windows, sofas and kitchen utilities.

We worked together on a shooting with recovered food.

A PRESENTATION ON MATERIALE CENTRALEN

VESTERBRO & NØRREBRO CHRISTMAS TREES

For the second time, we collaborated with the municipality to collect materials and build recycled Christmas Trees. We made workshops and activities for the public, creating Christmas decorations with recycled materials.

Our material flow consisted mostly on metal, wood and hard plastic.

SYDHAVN LIBRARY

We want to know our neighbours!

Therefore we are having a collaboration with our local library witch is linking us to other local projects.

A PRESENTATION ON MATERIALE CENTRALEN

TRASHOLYMPICS

We provided materials for the trash olympics event performed in Papirøen.
We conducted workshops about crafting recycled mini-boats.

HAWILA PROJECT

We helped Hawila project to restore two-masted wooden galeas boats and improving his workshop projects.

Our material flow consisted mostly on wood, pallets and planks.

One man's trash
IS ANOTHER
man's treasure!!

A PRESENTATION ON MATERIALE CENTRALEN

MATERIALESKOLEN

This project was suggested by the students of the Design School during the exhibition we had together in the Guldminen.

We want to build connections with schools and have workshops about up-cycling materials.
